PROJECTS

[Expense tracker ↗](#)  
Jul 2024 - Sep 2024

An expense tracker is a tool or application designed to help individuals or businesses monitor and manage their financial transactions. It allows users to record daily expenditures, categorize them (such as food, utilities, entertainment, etc.), and track income, providing insights into spending habits and budgeting. With features like visual reports, balance summaries, and reminders, an expense tracker simplifies financial planning, aids in reducing unnecessary spending, and ensures better financial control and savings

**Interactive UI**  
Aug 2024

A sample UI of my work using Next.js and Tailwind CSS.

**Noteapp**  
Apr 2024 - May 2024

I have made up prototype of notepad which includes some additional features like adding images adding gives and adding sticky notes into it with the option of theme change. I have used Java language for making it.

**To-Do List**  
Aug 2024 - Present

A web app for managing tasks and organising your daily tasks . I created this with help of Next.js and Tailwind CSS.

SKILLS

- Python
  - English Proficiency (Spoken)
  - Next.js
  - CSS
  - Firebase
- MySQL
  - English Proficiency (Written)
  - Tailwind CSS
  - JavaScript
- Java
  - C Programming
  - HTML
  - Amazon Web Server (AWS)

ADDITIONAL DETAILS

- I have Secured 2nd rank in Hackathon SRM Builds 5.0 x fintech Organised by CIIE ,SRM University.
